Grüner Veltliner likes loess The wine-growing area, Donauland (Danube) was renamed in 2007 to "Wagram". In this area, 6000 acres of vineyards spread over two very different areas: North of the Danube stretches east, then to the *Kamptal* the actual *Wagram*, a powerful ground level, about 30 km to the east. South of the Danube, are the small wine villages of the Tulln field, but also the historic wine town of Klosterneuburg on the outskirts of Vienna.

Katharina GRÜNER Veltliner Wagram DAC 2022

The particular character of this Grüner Veltliner is mainly influenced by loess soil. It is a perfect blend of grapes resulting from several harvest runs, producing a wine with great freshness, and an intense varietal character, paired with a quite powerful finish. This Veltliner shows lovely aromas of tropical fruits and citrus notes.

RIESLING Feuersbrunn Wagram DAC 2022

ROTER VELTLINER Feuersbrunn Wagram DAC 2022

Known as a speciality of our region this wine displays aromas of flower honey, quince and tangerines, very complex with a beautifully balanced acidity.

Roter Saphir ROTHER VELTLINER Wagram DAC 2021

When we talk about our fully developed Saphir wines we also need to talk about young people and their fresh innovative spirit. It is Florian, the youngest family member, who brings new ideas to life and likes to experiment with the skills he gained during his internships. Spontaneous fermentation, fermentation and storage in wooden barrels or other containers, prolonged lees contact, and a long maturation period characterize these wines.

Vineyard 30 hectares (64 acres) | **Wine Region Carnuntum** Years of tradition characterize the wine growing area of Carnuntum. After the Celts, this region experienced a glorious epoch under the Romans. The Heidentor, the symbol of our wine growing region in Carnuntum, is just one of the awesome excavations you can visit in the Carnuntum Archaeology Park. | **Pannonian Climate** Characterized by dry summers and warm autumns, it allows us to cultivate excellent white and red wines from very ripe grapes. | **Arbesthaler Hügelland** Extensive sunshine with enough rainfall, prevents from the cold wind from north - west (river Danube) | **Pannonian Lowland** In the Southeast, blows warm and dry wind. The chain of hills is sickle-shaped and warmed up by the sun from the early morning until the late evening. | **Danube River** brings cooler temperatures during the nights, which lead to intensive fruit and aromatic wines | **Soil** Ranges from very nutritious loess to poor and dry gravel – these differences are taken into consideration during planting. Accordingly our spicy and fruity white wines grow on the poor gravel and our powerful and rich reds on the nutritious soils. | **Organic farming** Our philosophy is to work in unison with nature and the weather; we are obliged to preserve the health and the reserves of our soil for the future generations.

TRADITION. ORIGIN. INDIVIDUALITY.

Our winery is located in Furth-Palt, in the southern Kremstal. Here we cultivate 10 hectares of vineyards around the Göttweiger Berg. The winery is now run by the second generation of women – Marlies, who took over from her mother Helma. The female finesse can be felt in the wines; we attach great importance to tradition, origin and individuality. As much as necessary, as little as possible, that's the principle we work by. The focus is on Grüner Veltliner and Riesling, but we also vinify Burgundy, Rosé & Muskateller, as well as three sparkling wines according to the traditional method. In addition, we are currently converting to organic farming.

In the circle of vines.

A major part of the winery's single vineyards are located on loess soil as well as on stony, nutritious, not too heavy soils. Variety and diversity ensure delight in more than just one dimension.

Therefore classic loess soils feature the single vineyard "Sätzen", which creates ideal conditions for especially aromatic Grüne Veltliner (Satz Viertel).
