Vineyards: 10 hectares (24.7 acres)

Wine Region Neusiedlersee: Great sweet wines - velvety reds. The eastern shore of Seewinkel on lake Neusiedl, between Illmitz and Apetlon, offers perfect conditions for all levels of sweet wines due to the warm, shallow lake and its special, highly humid microclimate, which encourages the formation of noble rot. On the other hand, the light soils shape the character of the wines and promote the quality wines from their village, Apetlon. The vineyards that belong to Steindorfer are also found on the lakeshore.

The Pannonian Climate: Hot dry summers and cold winters along with the temperature-regulating influence of Lake Neusiedl, bring about long vegetation periods. High humidity and autumn fog contribute to the development of botrytis cinerea, which is the basis for top quality sweet wines, such as Beerenauslese (BA) and Trockenbeerenauslese (TBA).

The Soil and Different Grape: The highly diverse soil structure, from loess and black earth to sediment and sand, allows a wide range of vines to thrive. Apart from the leading white varietal, Welschriesling, mainly Weissburgunder (Pinot Blanc) and Chardonnay, as well as aromatic varieties, are found in the area. Red varieties planted here are Zweigelt, Blaufränkisch, St. Laurent and Blauburgunder (Pinot Noir) as well as newly added international varieties. Whether fruity and charming or matured in barriques, from ungrafted vines or as cuvée blends, the red wines of the Neusiedlersee region are clearly on the track to success.

Production: In Burgenland, you will find more and more red varieties being planted. Ernst Steindorfer has produced numerous award winning red wines for many years.

Ernst was the winner of the International Trophy 2005 Winery of the year (AWC)

Steindorfer Welschriesling 2018 Refreshment!

Beautiful fresh aromas of rich green apple and citrus, which follow through on the palate. It is round, soft, mineralic and has a refreshing dry finish.

Alc. 12.0% – acidity 6.0 g/l – residual sugar 1.5 g/l
