the vineyard

The flat lands of the vineyards around Dürnstein and Loiben are characterized by very deep sandy soils. This very warm and light soil has low water holding capacity. Through this ever-moderate stress situation the roots are encouraged to penetrate the deepest layers of soil to ensure the water supply of the plant - the age of our 50-year-old vines guarantee this optimum root growth and maturity of the wood.

tasting notes

Sandy and gravel soils form a classic, fruity Grüner Veltliner. The reserve substances stored in the old wood are reflected in the subtle minerality of the wine - different weather conditions are responsible for fine and elegant fruit flavors.
